

CLEAR NCD INFORMATION COORDINATED MEDICATION REVIEW

People receiving long-term NCD care may use medicines prescribed by different healthcare professionals. Safe medication care requires accurate information, clear communication and review by qualified healthcare professionals.

MEDICATION SAFETY INCLUDES

A complete and current medication record

Clear information about each medicine and why it has been prescribed

Allergies and possible medicine interactions checked by qualified healthcare professionals

Medication changes communicated between prescribers, pharmacists and care teams

Medication review and follow-up by qualified healthcare professionals

Medication safety is a shared responsibility
Strengthen medication information, communication
and review across NCD care
