

CONNECTED NCD CARE

CLEAR NEXT STEPS

People receiving long-term NCD care may receive care from primary healthcare clinics, hospitals, specialist teams and pharmacies. When care moves between teams or settings, relevant information, responsibilities and follow-up arrangements must remain clear

SAFE TRANSITIONS AND FOLLOW-UP INCLUDE

Relevant health information shared with the next care team

Care plans and medication changes communicated clearly

Responsibility for each next step confirmed

Follow-up appointments and other next steps arranged

Patients and caregivers informed about the follow-up plan and who to contact with questions or concerns

Continuity of care is a shared responsibility
Strengthen transitions and follow-up across NCD care
